

SatQuery AI - Analysis Report

Job *job_0b121e78403e* | task: *sar_optical_fusion*

Query

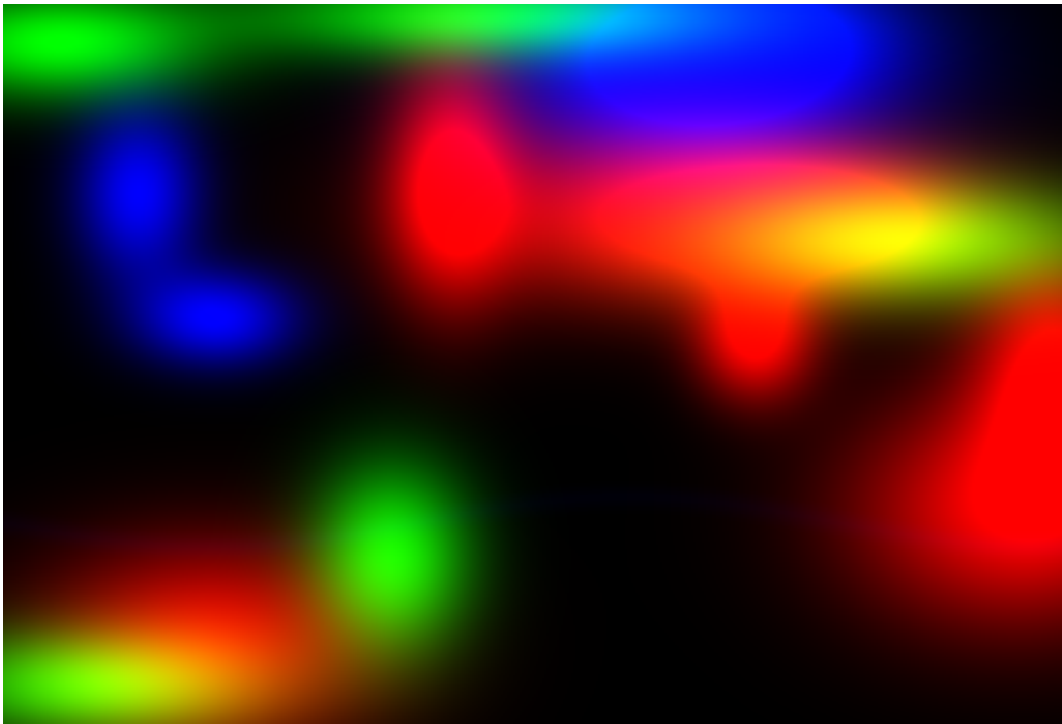

Use the optical and SAR images together to identify built-up and water-covered regions.

Answer

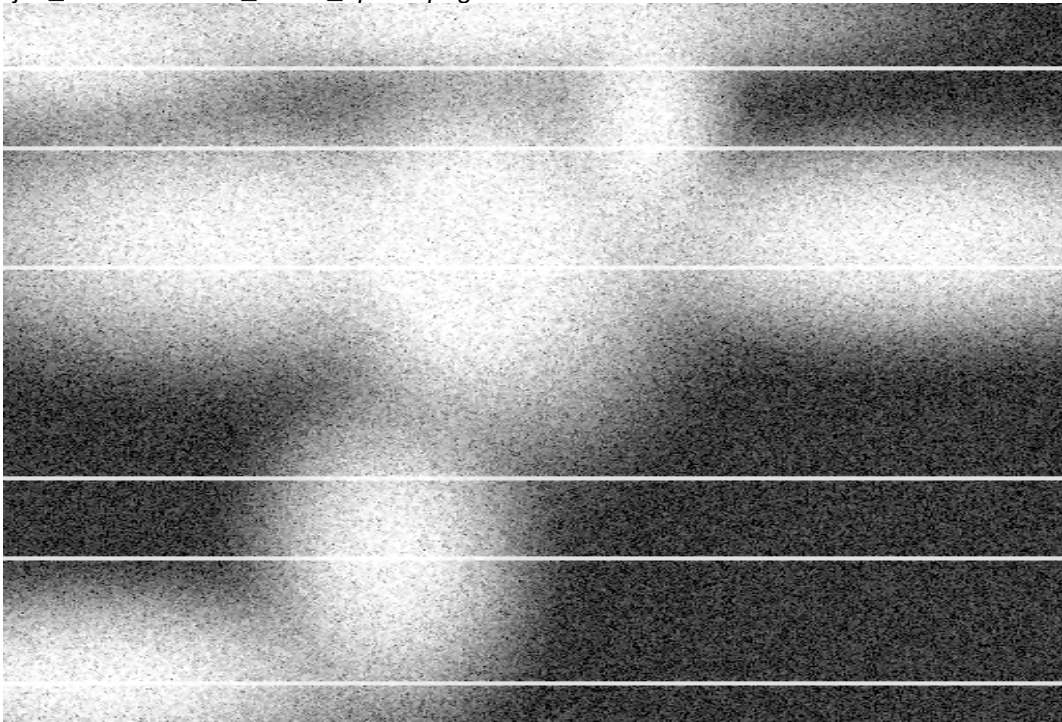

Using optical and SAR evidence jointly: modalities [optical, sar] built-up regions and water-covered regions are identified with high agreement across both sensors. [mock output - wired to real specialist once adapters ship]

Confidence

mock — Deterministic placeholder (skeleton/demo mode), not a calibrated score.

Evidence 1: *job_0b121e78403e_areaB_optical.png*
